EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Douglas Pavelko on 21 June 2006.

2. The application has been amended as follows: The term "inner" has been replaced with the term --outer-- in line 25 of page 5 and line 11 of page 9 of the specification, to correctly identify which element of the invention is being described.

In claim 34, the terms "non-cast" and "cast" have been removed from lines 5, 14, 18 and 12, 19, respectively. The term "and" has been replaced with the term --an-- in line 2 of claim 34.

In claim 42, the term "and" has been replaced with the term --an-- in line 2. The terms "non-cast" and "cast" have been removed from lines 11-12.

These corrections are for grammatical clarity and to eliminate antecedent issues in the claims.

The period (.) at the end of line 12 of claim 42 has been replaced with a comma (,) and the following text has been added to the claim: --wherein the outer diameters of said inner wheel hub portion and said outer wheel hub portion define a constant outer

Art Unit: 3617

diameter circumferentially along the entire axial length of said axially extending main body portions thereof. --

Election/Restrictions

3. This application is in condition for allowance except for the presence of claims 22-30 directed to a method for producing, which was non-elected without traverse. Accordingly, claims 22-30 have been cancelled.

Allowable Subject Matter

4. Claims 19-21 and 31-49 are allowed.

5. The following is an examiner's statement of reasons for allowance: The prior art does not show or suggest a wheel hub assembly including an inner wheel hub portion having lugs that are embedded in an outer wheel hub portion at a connecting portion, wherein the outer diameter of axially main body of both hub portions is constant over the entire axial length.

Neither Reid nor the Vignotto et al references shows the entire axial length of the area where the inner hub portion attaches to the outer hub portion having a constant outer diameter.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jason R. Bellinger whose telephone number is 571-272-6680. The examiner can normally be reached on Mon - Thurs (9:00-4:00).
